

Faculty of Built Environment
Business Ethics
Special/Supplementary Exam - August 2014

Instructions:

- Read the questions carefully and understand them
- Answer **only three (3)** questions: **ONE** from **Each Section**
- Write clearly using **GOODBLUE** ink
- Not more than 4 written pages per question

Section A: (50%)

1. Why and how are the Core Principle Values of Architecture proposed by *Business Ethics* so important in the Housing Industry of your country's business Competitiveness and Sustainability?

Section B: (25%)

2. Statistical data in Uganda point to a shortage of about 1.5 million housing units. And yet many argue there are just too many mushrooming housing estates in the country. Discuss.
3. There are some architects who always shift the blame onto their clients when a building project goes wrong. How can you explain the importance of architectural professionalism in avoiding such problems?
4. What is Social Justice? How could architects use Corporate Social Responsibility to improve the former, especially in developing countries?

Section C: (25%)

5. What is Corporate Governance? How does accurate information flow contribute to the competitiveness and sustainability of the building-construction industry of your country?
6. What is corruption? How has it affected infrastructural development which would aid the services of architects and construction engineers in your country? What realistic measures could you suggest to reduce this deadly vice?
7. How has construction industry contributed to the loss forest cover in your country? What viable and concrete measures could you suggest to keep the industry sustainable?

Good Luck
