Time: 10:00am – 01:00pm (3 Hrs)

Date: 10th August 2015

Instructions:

- i. *Attempt any 4 questions*
 - ii. *Write clearly, number the questions appropriately on the answer booklet*
 - iii. *Read and understand the instructions on the last page of the answer booklet*
 - iv. *Do not write anything on a question paper*
-

1. Describe various characteristics of a project and a program you are familiar with.
2. Why do you think it was important to involve community members in all project planning and management stages?
3. What in your view are the major stages of a project **life** cycle?
4. What areas do you think community and individual members cannot handle and they would require intervention of the government?
5. Describe the major components of a project **management** cycle. At what phase do you think project monitoring and evaluation should be conducted; give reasons to support your answer.
6. By use of valid examples, give the undermining features of community participation in Project planning and management.
7. If you were a project manager in your community, what would be the golden rules that you would advocate for successful management of your project?
8. Briefly explain the difference between a concept note and a project proposal. Explain the major sections of a project proposal.
