Tuesday 05th/August/ 2014

2:00pm - 5:00pm

Instructions:

1. Please read the instructions carefully before answering the questions.
 2. Read each question carefully and write legibly.
 3. Attempt **ONLY FOUR** questions
 4. Do not write anything on this question paper.
 5. Answers to each question must start on a fresh page
-

1. In your study of Bio-Environmental Ethics, you learnt of the need to preserve and protect the natural environment. Discuss the approach known as **anthropocentric ethics** and the **four traditions** the anthropocentric approach is associated with.
2. In your study of Bio-Environmental Ethics, you learnt of global warming and climate change. Explain the danger posed by the **greenhouse effect**.
3. In your study of Bio-Environmental Ethics, you learnt of Air Pollution. Explain **in-door-pollution** and its dangers to human health.
4. In your study of Bio-Environmental Ethics, you learnt of the problem of overpopulation and its link to environmental degradation and world hunger. Explain the **Lifeboat** metaphor as advanced by the Neo-Malthusians to solve the problem of overpopulation and world hunger.
5. In your study of Bio-Environmental Ethics, you learnt of the problem of overpopulation and its link to environmental degradation and world hunger. Explain the **liberalism** response to the problem of overpopulation and world hunger.
